Spring Data

- „Familiar and consistent Spring based programming model for Big Data, No SQL and relational stores while retaining store-specific features and capabilities”
- Supported technologies
 - Relational databases
 - No-SQL databases (eg. Mongo)
 - Map-reduce frameworks (eg. Hadoop)
 - Cloud services
 - REST services

Spring Data Components

- Mapping (JPA)
- Spring template pattern
- Spring Data repository model
- Queries

Spring Data subprojects

Spring Data Query builder

Keyword	Sample
And	<code>findByLastnameAndFirstname</code>
Or	<code>findByLastnameOrFirstname</code>
Between	<code>findByStartDateBetween</code>
LessThan	<code>findByAgeLessThan</code>
GreaterThan	<code>findByAgeGreaterThan</code>
IsNull	<code>findByAgeIsNull</code>
IsNotNull,NotNull	<code>findByAge(Is)NotNull</code>
Like	<code>findByFirstnameLike</code>
NotLike	<code>findByFirstnameNotLike</code>
OrderBy	<code>findByAgeOrderByLastnameDesc</code>
Not	<code>findByLastnameNot</code>
In	<code>findByAgeIn(Collection<Age> ages)</code>
NotIn	<code>findByAgeNotIn(Collection<Age> age)</code>

Szünet, Hamarosan folytatjuk
